REPORT
OF THE
BOARD OF ADMINISTRATORS OF THE CHARITY HOSPITAL,
For the Year Ending December 31st, 1888.

CHARITY HOSPITAL,
STATE OF LOUISIANA, February 4, 1889. }

To His Excellency, FRANCIS T. NICHOLLS, Governor of Louisiana, Ex-Officio President of the Board of Administrators of the Charity Hospital:

YOUR EXCELLENCY:—In accordance with the law, it becomes the duty and pleasure of the Board of Administrators of the Hospital to report to you, through its chairman, its workings during the past year.

Your attention is respectfully invited to the accompanying detailed reports of the chief officers of the Hospital, especially those of the House Surgeon and Secretary and Treasurer, for a more intimate knowledge of its real work and needs, and the Board would esteem it a favor and great pleasure if your Excellency, and all friends of the Hospital, would frequently visit it, and see and know better its management and scope of benefaction.

The number of inmates in 1887 was 5999.

The number of inmates in 1888 was 6111, twelve more than the preceding year. The admissions in 1888 were six hundred and ten less than the average in the past ten years, and the mortality was about the usual average—that is, about fourteen per cent. of the whole.

There are many who are brought in in a dying condition who die on the first or second day. These eliminated, the true per cent. of deaths of those actually treated would be about twelve per cent.

There was no epidemic disease during the year.

The number of outdoor patients treated, called the outdoor clinic, was 13,524. The public, by this system, has received a vast amount of benefit, and by so treating them many have been saved the necessity of entering the institution, thereby saving the Hospital much additional expense. We cannot too strongly commend, in this connection, the urgent and repeated recommendations of the House Surgeon, that a suitable building or buildings should be erected, at the earliest possible time, for this constantly increasing work outside of the Hospital proper; as this vast number of visitors treated in the wards, as they are now from necessity, is very disturbing, and might be, sometimes, fatal to those very sick in the Hospital.

By adding to the number of indoor and outdoor patients just enunciated, the list of surgical cases dressed and treated in the amphitheatre of the Hospital, the total number treated in 1888 was 20,364. These facts furnish some idea of the vast amount of work done, and relief given, by this noble institution. The final debt due on the Ambulance Building, at the beginning of the year, has been paid, and the Hospital is now free of debt for the many solid improvements made during the last few years, thanks to the able management of the preceding Board; but is now hampered and cramped for want of means to accomplish other equally necessary improvements. The Hospital sadly suffers, and is much less efficient than it would be, on account of its constant loss by the discount on its warrants. The Board cannot too strongly urge this point on your Excellency's attention, for it is a grievous loss, and mortifying to its Administrators, when they see how much more substantial good could be accomplished if its means were at par value. This deficiency in the State warrants is a constant source of regret and anxiety to the Board, and makes the efficient management of the Hospital very trying and precarious. The discount on the warrants of 1887 and 1888, as thus far reported and sold on January 10th ult., sums up \$10,650.

At present, an effort is being made to renovate the closet system, which is greatly needed for the general sanitary condition

and welfare of the inmates, and would have been done long since but for the deplorable disappointment in the warrants of the State. We cannot too urgently commend the Ambulance Service in all of its details, and think it should be strictly used, as at present, for emergency service only. The Board, with the advice and effectual aid of the House Surgeon, has recently instituted a better system of keeping the clinical records of the Hospital, and hopes soon to have a Hospital Registrar, for the purpose of compiling and systematizing, for reference, all of the useful records of the Hospital. The better ventilation of the main building is greatly needed, but this too is deferred at present for want of means, and on this subject, the straitness of our finances, your attention is again respectfully called to the concise report of our Secretary and Treasurer, herewith presented. It is with much regret and sorrow to us that during the year death claimed our able and most efficient pathologist of the Hospital, Dr. H. D. Schmidt, whose well merited reputation as a zealous worker, scientist and author, was extensively known and appreciated abroad as well as in America. His place was supplied by Dr. H. D. Bruns, who is working with great zeal, and will, we have every reason to believe, fill the position ably and satisfactorily. Attention to his accompanying report is invited, and the necessity is urged for fostering his efforts in this very necessary and useful department of the Hospital service.

For the good of the Hospital, the Board is much gratified that our Legislature, at its last sitting, did not couple with its allowance for the Hospital, in its annual support, a proviso that no one should be allowed to compete for resident studentship of the Hospital except a Louisianian. This permits students of the Tulane University Medical Department, regardless of their State, to compete, as was always done heretofore; and we think this will redound to the great advantage of the Hospital, as it will furnish the best talent to its service. And, in the judgment of the Board, it has been decided recently to make the competition of the applicants for admission more varied, thorough and practical by adding

to the written examination, as heretofore, an oral and clinical examination as well; thereby having students enter the Hospital who are practical and efficient at the beginning of their service.

It is with great pleasure we acknowledge a recent legacy to the Ambulance Fund by Mr. Jean Ferran. It is situated on Vil-lere street, in the rear of the Ambulance Building. It is a double French cottage with rear buildings, valued at about \$2000. Also, we acknowledge, with much gratitude, the many small donations sent to Sister Agnes for the benefit of the inmates. A list of them and their donors is herewith presented. These donations, we are happy to say, are increasing in later years.

In conclusion, the Board gratefully acknowledges the assiduous and devoted aid of the good Sisters of Charity in the conduct of the Hospital. Their judicious and economical management of the domestic affairs cannot be too highly prized or praised.

The constant zeal and fidelity of all the officers and personnel of the Hospital deserves and merits our special mention and warmest commendation. The Ambulance Corps is always prompt and untiring in answering calls of distress. The Library of the Hospital, whilst slowly growing and expanding, needs the fostering care of the friends of the institution. The Board would be thankful for books and periodicals of recent medical literature, which would enhance its usefulness and fill its shelves.

The Department of Dentistry, recently inaugurated under the fostering care of the preceding Board, has done the inmates and the outdoor visitors great good and comforting service. It is conducted by the kind services of Dr. A. G. Friedrichs.

With assurances of high esteem and regard, I remain your obedient servant.

C. J. BICKHAM,
Vice-President.

REPORT OF THE SECRETARY AND TREASURER.

CHARITY HOSPITAL,
STATE OF LOUISIANA,
NEW ORLEANS, February 4th, 1889. }

To the Vice-President and Board of Administrators:

GENTLEMEN:—I present herewith the usual Annual Statements, and would respectfully submit for your consideration the following resumé under appropriate heads :

STATE WARRANTS, 1887.

The Hospital warrants for 1887 (\$40,000), were in part redeemed by the State Treasurer, as follows :

Feb. 4th, 1888, 1st and 2d quarters.....	\$20,000
March 26th, 1888, 3d quarter.....	10,000
April 3d, one-half 4th quarter.....	5,000

Making a total in cash of..... \$35,000

leaving unredeemed \$5,000, being one-half of the issue for 4th quarter, 1887. The last named were held by the Board, and hypothecated from time to time as necessity demanded. They were finally sold Jan. 10th instant, at 49 cts. on the dollar, making a discount loss to the Hospital of \$2,550.

STATE WARRANTS, 1888.

Of the warrants for 1888 (\$36,000), \$10,000, for the first quarter of the year was paid by the State Treasurer, March 2d, 1888. The balance of the appropriation (\$26,000), as received, was held by the Board and hypothecated from time to time. On the 10th January, instant, the third and fourth quarters, \$8,000 each, in all \$16,000, were sold at a discount of 49½ and 49½ cts., making a

clear loss of \$8,100. The warrants for the second quarter of 1888, \$10,000, are now on pledge with the Louisiana National Bank.

DISCOUNT ACCOUNT.

This account, made for the year 1888, and ending Dec. 31st, shows a debit of \$669 34 ; being amount paid banks for discount (6 per cent.) on notes based on pledges of warrants. The large discounts recently suffered on sales of warrants made January 10th, inst., will appear in the next Annual Report.

BILLS RECEIVABLE.

This account was added to during the year by note of the Louisiana Electric Light and Power Company, at twelve months date, from September 15th, 1888, for \$2,000, and bearing six per cent. per annum interest. It was given by that corporation by arrangement with the Board, as a commutation for the franchise of electric lighting, bestowed upon the Hospital by the company's contract with the city of New Orleans, the Board of Administrators of the Hospital concluding to dispense with such extra lighting, in view of the final determination of their extended privileges of gas lighting imposed upon the New Orleans Gas Light Company, by decision of the Supreme Court of the State.

The amount of the note is being devoted to the erection of automatic improved water closets throughout the Hospital.

LEGACIES.

On the 15th of the current month, the Hospital came into possession of property recently bequeathed it by will of Mr. Jean Ferran, deceased. It is situated a short distance in the rear of the Ambulance building, on Villere st., between Gasquet and Tulane avenue, and consists of a double French cottage and rear buildings. The value of the property is estimated to be \$2,000.

AMBULANCE BUILDING FUND.

On June 5th, 1888, the balance of the indebtedness resting upon the Ambulance building was paid. The account as summed

up and detailed in the auxiliary books kept especially for that purpose, show the entire cost of the building, street banquets, bridge plates, for street gutters, yard pavement, electric attachments, etc., to be \$16,478 90.

IMPROVEMENTS AND REPAIRS.

The amount expended during the year 1888, mainly for repairs, reconstruction, painting, kalsomining, and purchase of ordinary engineer's supplies and hardware, foots up \$3,957 52. This amount includes cost of the "Schillinger patent pavement" for the wash house floor, and cost for the change of the blue to the white grounded and figured glass, placed in the main doors and windows of the annex or women's wards.

AUCTIONEER'S RETURNS.

The comparison of returns from auctioneers, for 1888, with those for 1887, show as follows:

For the year 1887, there was received.....	\$9,231 03
For the year 1888, there was received.....	8,500 24
a falling off in this income of.....	\$ 730 79

In conclusion, I present "Tables of Receipts and Disbursements for 1888," "Comparative Tables Disbursements for 1887-1888," "Balance Sheet of the Books to December 31st, 1888," "Table of Property, etc.,," "Statement of Insurances," and "List of Cash Donations, etc."

Respectfully,

EDWIN MARKS,

Secretary and Treasurer.

REPORT OF THE HOUSE COMMITTEE.

CHARITY HOSPITAL,
STATE OF LOUISIANA,
NEW ORLEANS, February 2, 1889. }

To the Vice-President and Board of Administrators.

GENTLEMEN:—The House Committee begs leave to report: That the general condition of matters connected with the various Departments continues fully up to the high standard heretofore established.

The Electric Light Plant, which was received from Electric Light Company, Maurice J. Hart, Manager, was lying unused and useless for a considerable length of time, and after the proper Hospital authorities had decided not to use it, your Committee then made a sale (with approval of the Common Council) of it for the sum of two thousand dollars. This amount to be used and appropriated to the purchase of approved styles of water closets, which has been done, and are now starting the work of placing them in the main building, after which they will be placed in all the different buildings. The old piping connecting with sewers will all have to be replaced, as they have been found to be worn out and leaking.

You will find annexed the report of Mr. Ponder, the able Engineer of this institution, as also a list of all tools and appliances in his Department and charge.

The Ambulance Service is in very fair condition. We have ordered one set of new patented harness. The service and general condition of the department is good.

The old and unevenly laid flagging, forming the old floor of the Wash House, has been taken up, and the Schillinger patent

pavement placed instead, with perfect drainage facilities. The old flagging has been used as a pavement in front of the Wash House, making an improvement over the former brick pavement.

Painting has been done to some extent, including the two wing buildings, cisterns, and smoke stacks of the engine room. The Treasurer's office and the Library rooms have been renovated.

An improved steam starch kettle has been added to the Wash House.

Six new sewing machines, run by steam power, have been introduced.

A new air refrigerator has been placed in the Ice House.

The blue glass formerly in the main openings of the Annex or Women's Wards, has been removed, and white cut and ground glass substituted. The eastern end of the Annex has been much improved by the making of a large opening in the former blank wall forming windows of the white cut glass, and affording more light and additional ventilation.

In the Internal Department of the Hospital, it was deemed necessary that two of the students should be brought before the Board for infraction of the rules, and after a careful hearing and examination of all parties, before the full Board of Commissioners, they were suspended, for a limited period, from their functions. It is to be hoped that this salutary example will impress itself upon the corps of students, so that this unpleasant duty will not again devolve upon this Board.

In the death of that learned scientist, Dr. H. D. Schmidt, Chief of the Pathological Department, this Board has met with a great loss. The high order of his attainments in this department redounded to the credit of this institution, and of the country.

At an election held, Dr. H. Dickson Bruns was unanimously elected to fill his place.

It is the intention to develop more fully the pathological specimens in this most important department.

There has been a legacy left to this institution by Jean Ferran, consisting of real estate estimated at two thousand dollars, and, according to the established custom, the name of the deceased has been placed upon the Tablet. The property will be rented out to some of the employés of the Hospital.

At the recommendation of the Vice-President and Chief Surgeon, a fuller and more complete method and system of examination of the medical students has been organized, and rules adopted by this Board, by which a thorough practical as well as theoretical knowledge of medical science will be more fully learned and developed; and it will materially raise the standard and qualifications, learning and practical experience of the students, who will, on leaving this institution, be much better fitted for the high and responsible duties devolving upon them.

We will permit ourselves to add, that well merited thanks are due to the two distinguished gentlemen, for their efforts in developing this very essential matter, and which we look upon as of paramount importance.

That portion of the interior management of the Hospital under the management of Sisters of Charity, exhibits the same good condition, cleanliness and thrift as in the past.

W. G. VINCENT.

J. H. KELLER.

REPORT OF THE FINANCE COMMITTEE.

CHARITY HOSPITAL,
STATE OF LOUISIANA,
NEW ORLEANS, February 4, 1889. }

To the Vice-President and Board of Administrators:

GENTLEMEN:—Your Finance Committee would respectfully call attention to the recent heavy losses incurred by the Hospital in the sales of State warrants, at a discount which amounted to \$10,650, as specified in the report of the Treasurer.

The attention of the General Assembly has been frequently invited to this serious cause of impairment of the revenues of the Hospital. The current appropriations for its support are barely sufficient, when paid in full in cash, to maintain the institution on the most narrow basis of pinching economy; but when we have to realize on the appropriations at a heavy discount, as occurs almost every year, we are not only crippled as to supplying absolute necessities, but forced to consider, at certain periods of the year, the imminent risk of total failure of the means of support.

The financial burthens of the Hospital are yearly increasing. The growth in the number of patients applying for treatment in the "out door" service is constant and remarkable, and should be taken into account when appropriations are to be made by the General Assembly.

It cannot be too strongly urged upon the General Assembly to make their appropriations on the basis of cash to the Hospital; such a basis will not only improve the usefulness of the institution, but will be true economy and real charity as well.

Respectfully submitted,

JNO. G. DEVEREUX,
G. W. SENTELL,
M. SCHWABACHER.

In Memoriam.

H. D. SCHMIDT, M. D.

AT a regular meeting of the Board of Administrators, held December 3, 1888, the following resolutions were unanimously adopted :

"Resolved, That we deplore sincerely the loss of Dr. H. D. Schmidt, the Pathologist : a man of simple and pure character; a physician of rare accomplishments and exalted aims, whose life was devoted, with equal fervor, in the service of military hospitals and in the gentle pursuits of civil life, to the study of means for preserving the lives of his fellowmen ; a conscientious officer, whose professional labors in this institution comprise a part of its medical history.

"Resolved Secondly, That this memorial shall be engrossed in the minutes of this meeting ; that a separate page in the next Annual Report shall be inscribed to the memory of the deceased ; and that a copy of these resolutions shall be suitably prepared and presented to his widow, with assurances of our sympathy and respect."

* * * * *

A true extract from the minutes.

New Orleans, February 4th, 1889.

EDWIN MARKS, Secretary.

DONATIONS.

ACKNOWLEDGED BY SISTER AGNES, 1888.

Mrs. Jos. Rice, basket of cakes, nuts and candy for children.

Mrs. Hayden, six calico slips for children.

C. Doyle & Co. and Smith Bros. & Co., one load kindling wood each ; also one gallon cognac, one gallon whiskey and one case of claret.

Schwartz & Son and Danziger, reading matter daily.

Joseph A. Walker, one case of champagne.

A. Lehman & Co. and C. Doyle & Co., one load of kindling wood each.

Mrs. Muller, cakes and picture books for children.

Mrs. S. P. Center, Ottawa, Ill., cash, \$25.

Little boys "Harry and Hoyt Post," of Holland, Mich., pretty scrap books and cards for children.

Mr. Harry Fairchild, one large red snapper, seventy-five pounds.

Mme. Von Ahlefeldt, of Virginia, cash for children, \$20.

Mr. J. Devlin, cash, \$5.

Mrs. S. Latte, 444 Camp street, through A. Brousseau, large new Brussels carpet.

J. H. Lamb, one large bunch of fish.

Mrs. A. Baldwin, cash for children, \$5.

Mrs. George Denegre, one case strawberries for boys' ward.

Mrs. M. W. Cosgrave, walking-basket for babies.

Mrs. E. Hill, two horse-rockers for children.

Mrs. Gillis, twelve boxes strawberries for boys' ward.

Mrs. L. Ruch, old linen for charpie.

Mr. J. B. Taylor, Lafourche parish, twelve copies Lafourche paper.

Mrs. Munich, four dozen face towels.

Mrs. George Denegre, carriage ride for patients.

Mrs. Dr. Borde, a lot of gentlemen's clothing.

Mrs. Suddath, one pair cuspadores and two yards table oil cloth.

Mrs. Hines, two pairs of slippers.

Mrs. Laughlin, sundry clothes and old linen.

B. Lillian Bower, old linen for charpie.

A friend, reading matter and bouquets sundry times.

King's Daughters, "Natchez," pretty scrap-books for children.

Messrs. Gilfoil and Erwin, cash, \$10.

Wm. Rivers and Albert C. Phelps, reading matter for patients.

Miss Rawlins, cakes, fruit and clothes, sundry times.

F. Carroll, "Gas Works," reading matter.

Mrs. Pervis, Sunday magazines.

Mrs. J. Hobson, reading matter.

A stranger, \$5.

E. J. Guerenger, large samples of quilts and blankets.

Mr. Sebo, jean samples for making slippers.

A. Lehman & Co., case of samples, sundry times.

Mrs. J. Moran, "Fort St. Philip," one barrel oranges.

George Koch, "French Market," fruit and vegetables, sundry times.

Louis Ruch, fruit, sundry times.

Mrs. A. Seigle, two large cakes, one box calico cuttings for quilts.

Miss Flora Loeb, cakes, fruit and clothes for old people.

Mrs. George Pitcher, "Alma," two barrels sugar and two barrels syrup.

Owen Cahill and Geo. Koch, one large turkey each.

J. L. Bur, twenty-five heads cabbage.

Mrs. I. Newman, one hundred choice cakes and bag of candy.

A. K. Shattuck, one hundred oranges.

Southern Brewing Co., one case pints ale.

Mrs. Geo. Denegre, one bag of oranges for boys.

Messrs. Hallahan and Cavanagh, of New York, six cut glass globes.

Mrs. Schwabacher, Mrs. A. Goldstein, and Mrs. J. Levy, hose, shawls and handkerchiefs.

C. Doyle & Co., one box candy, thirty pounds.

Mrs. Hernsheim, Mrs. I. Scherck, Mr. W. E. Parker, Mr. E. L. Seemann, Mr. W. J. Montgomery, Mr. W. S. Brickell, Mrs. George Denegre, Mrs. W. Muller and Mrs. J. Levy, toys, clothes, etc., for children's Christmas tree.

Mrs. J. M. Rice, one box of cakes, thirty pounds.

Messrs. Levy, Loeb & Co., calico samples for quilts, sundry times.

Mrs. George Denegre and E. Farrar, turkey, nuts, raisins and candy for boys.

Miss Villere, Mrs. D. Jamison, E. B. Kruttschnitt, Mrs. Geo. Denegre, Miss Jamison, Mrs. Aikens, Mrs. Puig, Miss H. Leeds, Mrs. A. Gillis, Miss Adler, Mrs. Vaught, Mrs. S. P. Walmsley, and Mrs. Farrar, suits of clothing for children.

Mr. John Ponder, for children, \$5.

Mrs. Harry Allen, Mrs. R. M. Walmsley, Mrs. Cottraux, Miss Amelia Behan and Miss Aikins, clothes for children.

Miss M. May, Mrs. Geo. Denegre, Mrs. Harry Howard, Mr. E. H. Farrar, Mr. Omer Villere and Mr. E. Kruttschnitt contributed for two rides weekly for the children during summer, and Mr. Johnson kindly furnished vehicles and terms at half price.

Mrs. Seeman's Kindergarten and Froebel Club furnished Christmas tree with many pretty toys, dolls, etc.

Ladies of the Flower Mission visit the Hospital regularly, bringing fruit, flowers, etc.; and for Christmas, their usual offering for patients numbers seven hundred bags of fruit and candy.

Weekly contributions of reading matter are received from boxes placed in public buildings by Mrs. George Denegre.

Contribution box in Hall of Hospital, Main Building, \$17 70.

Messrs. Seabury and Johnson, New York, allowances on freight, \$3 75.

Mr. Wm. Duryea, New York, allowance on freight, \$4 00.

ANNUAL REPORT OF THE HOUSE SURGEON

CHARITY HOSPITAL,
STATE OF LOUISIANA,
December 31, 1888.

To the Board of Administrators:

GENILEMEN: I have the honor to present the annual report for 1888 on the general management of the Hospital, and submit herewith the records of the several departments of the medical service.

The total number of inmates treated was 6111, including 722 remaining at the last report, and 5389 new patients admitted. The inmates comprise 4433 white and 1678 colored; male 4420 (white 3314, colored 1106); female 1691 (white 1119, colored 572) children under ten years of age 146, (white, 134, colored 12).

The admissions were twenty-nine more than the previous year, but four hundred and eighteen less than 1886, less by seven hundred and fifty-four than in 1885, and six hundred and ten less than the average during the past ten years. No disease has prevailed as an epidemic during the year, and the number of admissions, so much below the average, fairly indicates the health of the people of the State and the sections tributary to New Orleans.

The daily average of inmates was greatest in January, seven hundred and fifty-two; smallest in October, six hundred and one. The daily average during the year was six hundred and seventy-three; nearly fifteen, the daily average of admissions.

Of the 6111 inmates treated, 4590 were discharged; cured 2423, or nearly forty per cent.; improved, 1517, or nearly twenty-five per cent.; unimproved, six hundred and fifty, or more than ten per cent.

There were eight hundred and seventy deaths—a total mortality of fourteen per cent. This is the average death rate of the Hospital. Deducting from the total one hundred and ninety-seven deaths, which occurred within the twenty-four hours after admission, the general mortality is reduced to eleven per cent.

An idea of the importance of the Outdoor Department of the Hospital is conveyed in the report herewith presented, showing the attendance of 13,524 patients. While a comparatively small proportion of this number comprises those who, although not in needy circumstances, yet feel that in any eleemosynary institution of the State they have rights and privileges, the vast majority is made up of the outdoor poor of this city, who are worthy of public charity. Most of these patients, especially those who suffer of medical diseases, are received and treated in the Hospital wards in the presence of the inmates. The objections to this system are obvious. So many visitors necessarily create disorder in the house and unavoidably disturb those of the inmates who are more seriously ill and injured. Such intrusions are only permitted in the absence of other provisions for the medical relief of the poor of this city.

The necessity of separate buildings suitably constructed for the purposes of the Outdoor Clinics of the Hospital becomes more and more apparent, and this we urge as a matter of great importance. The people of this city not only share with the inmates of the Hospital the alms of the State, but enjoy almost exclusively the benefits of the Outdoor Clinics. There is, therefore, an obligation resting on the municipal authorities to aid your efforts in all works of medical charity, of which the city people are the chief beneficiaries.

This city has reached that period in her growth when the necessities of her people demand the establishment of an institution, similar to those existing in all metropolitan cities for the medical relief of people outside of hospitals, who are worthy of public charity. The Vanderbilt Clinic of New York City is a model in-

stitution of its kind, simply providing consultation rooms and other facilities for the gratuitous treatment of patients, the medical staff doing the rest. Such a Clinic must be, and surely some day will be, founded in New Orleans, if not by the co-operation of city and State, by the bounty of some public benefactor, and we respectfully recommend to your honorable body initiative steps in this important work.

The Ambulance Service is working very satisfactorily, and all the members of the corps deserve special commendation for their efficiency and zealous discharge of duty. This service is reserved for cases of emergency only. Under the rules, its charity is extended alike to all who deserve it, whether they desire to be brought to the Hospital, or conveyed from the place of accident to their homes. The usefulness of this service appears in the report herewith submitted, showing that, during the year, 1265 patients received its benefits. The wear upon horses and wagons makes the service expensive to the Hospital. The good it has already done in this community should guarantee its independent maintenance. In 1886 the City Council appropriated \$5,000 to the ambulance fund. In view of the benefits conferred, an appropriation should be made annually.

Already the new rules in regard to the duties of Resident Students meet with general approbation. It is our purpose to improve the clinical records of the Hospital, with the view of increasing their statistical value. The clinical archives of the Hospital should, and in the future probably will, constitute an important part of the Medical Library. When the system of recording cases has been well established, a Medical Registrar should be appointed and charged with the duty of preparing and presenting an annual volume of Charity Hospital Medical Reports. It is contemplated that in the course of time a revenue will accrue from the sale of these volumes, which may be expended for the improvement of the Library, or for the encouragement of medical work in the Hospital.

The reports of officers in charge of their respective departments are herewith presented, all indicating the faithfulness and efficiency of those associated with me in the medical service.

Acknowledgments are due members of the visiting staff, on whom devolves, in largest measure, the care of the outdoor patients, for their punctual attendance and interest in Hospital work.

The domestic management of the Hospital by the Sisters of Charity, is a distinctive feature of its administration, which always deserves grateful mention in our annual reports. It is orderly, economical, efficient, and, withal, characterized by that kindly spirit which ennobles the life of those devoted to a mission of charity.

The medical work of the year, stated briefly, comprises the treatment of 6111 inmates, 13,524 outdoor patients, and 729 cases, mostly of minor surgery, attended in the amphitheatre, all told, amounting to 20,364 patients. These figures, compared with the expenditures, as shown by the report of the Treasurer, demonstrate the economy in administration. Comparison of our own with the reports of similar institutions elsewhere, bears out the statement that the system of management in the Hospital entails the least expense with the widest distribution of its charities.

There are no changes in the general rules and regulations of the Hospital which are at present desirable. The system of general management has been evolved out of the experience of our predecessors and our own, and accords with the spirit of our people and the charitable purposes the institution.

Respectfully submitted,

A. B. MILES,

House Surgeon.

PATHOLOGICAL DEPARTMENT.

CHARITY HOSPITAL,
STATE OF LOUISIANA,
NEW ORLEANS, February 1st, 1889. } }

To the Honorable Board of Administrators of the Charity Hospital:

GENTLEMEN:—I beg leave to submit the following report of work done in this Department during the year ending December 31st, 1888:

LIST OF THE MORE IMPORTANT SURGICAL OPERATIONS—CONTINUED.

42

Operation.	Result.				Total.	Diagnosis. Remarks.
	Cured.	Improved.	Unimproved.	Died.		
Excisions—Continued.						
Herniotomy.....				1		1 Strangulated Femoral Hernia.
Herniotomy.....	4					4 Strangulated Inguinal Hernia.
Herniotomy, Femoral.....				1		1 Excision of Gangrenous Intestine.
Herniotomy. Petit's Operation.....	2					2 Strangulated Inguinal Hernia.
Ligation—						
Vertebral Artery.....	1					1 Vertebral Aneurism.
Brachial Artery.....	1					1 Traumatic Aneurism of Brachial.
Femoral Artery.....	1					1 Popliteal Aneurism.
Femoral Artery.....	1					1 Femoral Aneurism Traumatic.
Femoral Artery.....			1			1 Popliteal Aneurism.
Femoral Artery.....	1					1 Traumatic Femoral Aneurism.
Axillary Artery.....	1					1 Stabbing Wound. Haemorrhage.
Hemorrhoids.....	2				2	
Laryngotomy.....				1		1 Naso-pharyngeal Polypus.
Laryngotomy.....				1		1 Aneurism Transverse Arch of Aorta.
Laryngotomy.....	1					1 Laryngeal Spasm.
Trephining—						
Rib.....	1					1 Empyema.
Skull.....				1		1 Compound depressed fracture.
Tracheotomy.....	1					1 Faucial Erysipelas.
Tracheotomy and Thyroidectomy.....		1				1 Cancerous Growth of Thyroid Cartilage.
Sequestrotomy—						
Tibia.....	3	1				4 Necrosis.

Segestrotomy—Continued.

Femur.....	1	1		2	Necrosis.
Inferior Maxilla.....	1			1	Necrosis.
Operations on the Urethra, Male—					
Ext. Median Urethrotomy.....	5			5	Stricture of Urethra.
Ext. Median Urethrotomy.....			2	2	Urinary Extravasation.
Gradual Dilatation.....	3	1		4	Stricture of Urethra.
Divulsion. (Bigelow's).....	5			5	Stricture of Urethra.
Divulsion. Method not stated.....	4			4	Stricture of Urethra.
Hypertrophy of Prostate. McGuire's Operation.....			1	1	
Lithotomy.....	1			1	Vesical Calculus. See Litholapaxy.
Lithotomy.....	1			1	Vesical Calculus.
Litholapaxy.....			1	1	Vesical Calculus.
Lithotrity.....		1		1	Vesical Calculus.
Operations on Female Genito-urinary Organs—					
Artificial Vesico-Vaginal Fistula.....	2			2	Chronic Cystitis.
Closure of Vesico-Vaginal Fistula.....	4	2		6	
Colporrhaphy.....	1			1	Cystocele.
Colpo-perineorrhaphy.....	2	1		3	Prolapsus Uteri.
Oöphorectomy.....			1	1	Fallopian Salpingitis. Peritonitis.
Ovariotomy.....	3			3	Ovarian Cysts.
Perineorrhaphy.....	7		1	8	Lacerated Perineum.
Procidentia. "Alexander's Opera- tion.".....	2			2	
Pelvic Hematocele.....	1			1	Evacuation of Clot.
Trachelorrhaphy.....	16			16	Lacerated Cervix.
Uterine Polypi.....	2			2	Ecraseur
Vaginal Hysterectomy. Martin's Operation.....	2		1	3	Epithelioma of Cervix.
Operations on the Eye—					
Extraction of Cataract without iri- deectomy.....	14			14	

LIST OF THE MORE IMPORTANT SURGICAL OPERATIONS—CONTINUED.

44

Operation.	Result.				Diagnosis. Remarks.
	Cured.	Improved.	Unimproved.	Died.	
Operations on the Eye—Continued.					
Extraction of Cataract with iridectomy	12				12
Removal of Pterygium.....	7				7
Enucleation.....	4	1			5
Paracentesis Corneæ.....	3				3
Slitting of Canicular Opening.....	2				2 Stricture of Nasal Duct.
Iridectomy.....	6	1			7
Excision of Melano-Sarcoma.....		1			
Tenotomy.....	2				Squint.
Opening Cyst of Lachrymal Gland .	1				1
Sclerotomy.....	1	1			2 Glaucoma.
Excision of Chalazion.....	2				2 Lower Lids.

SUMMARY OF OBSTETRIC CASES IN 1888.

There were 143 cases of Obstetrics.

White.....	84	Multiparæ	69
Colored.....	59	Primiparæ.....	74

There were three cases of twins, making the total number of children born 146,

PRESENTATIONS.		POSITIONS.	
Vertex.....	139	Left Occipito-Anterior.....	87
		Right Occipito-Anterior.....	28
		Right Occipito-Posterior.....	6
		Left Occipito-Posterior.....	5

MANNER OF DELIVERY.

Naturally.....	131
By Forceps.....	10
Podalic Version.....	2
Craniotomy.....	1
By Manual Traction	2

MORTALITY OF MOTHERS.

Of the 143 cases, 4 mothers died, making a mortality of 2½ per cent.

CAUSES OF DEATH.

Puerperal Peritonitis.....	1
Surgical Kidney—Phlegmasia Dolens.....	1
Uraemic Convulsions.....	1
Phthisis Pulmonalis.....	1

COMPLICATIONS OF CONFINEMENT.

Delivered naturally without accident.....	97
Cord around the neck.....	19
Prolapse of Cord.....	2
Laceration of Perineum.....	11

Post-partum Hemorrhage.....	3
Inertia of Uterus.....	3
Retarded labor due to short Funis.....	1
Eclampsia	1
Rigid Os Uteri.....	3
Retained Membranes.....	1
Retained Placenta.....	3
Extension of Arms: Breech Presentation.....	1
Hydrocephalic Head.....	1

The number of children born were 146.

Male	63	Living.....	128
Female.....	83	Still-born	18

Most of the still-born children were delivered before the seventh month.
